

MONROE COUNTY FIRE RESCUE — TRAUMA STAR

PRACTICE CHART — FICTITIOUS PATIENT — FOR QI TRAINING ONLY — NOT A MEDICAL RECORD

Practice Chart 2: Scene Call, MVC Trauma (target: 100%)

Date / OCA	2026-07-21 / PC-1002	Aircraft	Trauma Star South
Mission	Scene Call (Air)	Chief Complaint	Blunt chest trauma, MVC rollover
Pilot	R. Diaz	Nurse / Medic	M. Chu, RN / T. Beck, Paramedic
Pickup / Dropoff	US-1 MM 52 (scene)	Ryder Trauma Center	
Dispatch / Wheels Up	0904 / 0911	Land / Depart	0926 / 0935

Flight Narrative

Requested by Paramedic D. Ortiz, Rescue 22, Monroe County Fire Rescue (requesting agency) for a rollover MVC with prolonged extrication. Chief complaint: blunt chest trauma with tachycardia. Trauma alert criteria met; time-sensitive emergency with suspected internal bleeding. Upon arrival patient found supine on backboard, c/o chest and left hip pain.

HPI: restrained driver, rollover at highway speed, witnessed by bystanders; extrication by ground crew prior to our arrival. No medications prior to EMS arrival. Ground ALS unit on scene; patient requires trauma center capability not available in the region — nearest facility lacks trauma services and was bypassed. Bypassed Lower Keys Medical Center: no trauma center capability and facility on divert; flown to Ryder Trauma Center, the closest appropriate facility per trauma destination criteria.

Rotor-wing air transport chosen: ground transport time approximately 105 minutes per Google Maps via US-1 single-route access versus 31 minutes by air; the time savings is clinically significant for this hemodynamically compromised trauma patient. Air transport indicated due to ground EMS limitations and geographic access constraints of the island chain.

0928 BP 104/66 HR 122 RR 22 SpO2 94% on NRB. Temp 98.2 F. Cabin temp 74 F. Glucose 128. Pain 7/10; fentanyl 75 mcg IV at 0931; reassessed 0941 pain 4/10. 0941 BP 100/62 HR 118 SpO2 96%. 0951 BP 102/64 HR 112 SpO2 96%; hemodynamics stabilizing with ongoing fluid resuscitation; patient remains at high risk of deterioration without continuous critical care monitoring.

Max altitude 1000 ft. Radio report given to Ryder at 0946 with full trauma report; trauma alert activated at receiving facility. On arrival, report given to receiving physician Dr. S. Malone, MD and receiving RN C. Ivers; care transferred at bedside.
