

MONROE COUNTY FIRE RESCUE — TRAUMA STAR

PRACTICE CHART — FICTITIOUS PATIENT — FOR QI TRAINING ONLY — NOT A MEDICAL RECORD

Practice Chart 5: IFT, LVO Stroke (target: 100%)

Date / OCA	2026-07-24 / PC-1005	Aircraft	Trauma Star North
Mission	Interfacility (Air)	Chief Complaint	LVO stroke, right MCA
Pilot	A. Turner	Nurse / Medic	K. Lane, RN / J. Ford, Paramedic
Pickup / Dropoff	Mariners Hospital	Baptist Comprehensive Stroke Center	
Dispatch / Wheels Up	0710 / 0716	Land / Depart	0731 / 0748

Flight Narrative

Requesting agency: Mariners Hospital ED. Requesting provider and sending physician Dr. Omar Feld, MD; accepting physician Dr. Rita Chan, MD, neurointerventional, Baptist. Diagnosis: right MCA large vessel occlusion ischemic stroke, last known well 0555, within the intervention window. Time-sensitive emergency. Sending facility lacks thrombectomy capability, not available at the pickup location.

HPI: 71-year-old found by spouse with left-sided weakness and slurred speech at 0610; events leading to transfer: CT without hemorrhage, CTA showing right M1 occlusion. Prior to arrival: no thrombolytics given, blood pressure managed per stroke protocol. Infusions running prior to assessment: none; saline lock in place. Labs: glucose 132, INR 1.0, platelets 240; remaining labs pending.

Rotor-wing air transport chosen because ground transport time approximately 96 minutes per Google Maps versus 25 minutes by air; the 71-minute time savings is clinically significant for this thrombectomy candidate within the intervention window. Requires continuous neurologic monitoring beyond the scope of available ground providers. Transported to Baptist, whose comprehensive stroke center and neurointerventional capability meet this patient's needs.

0733 BP 168/92 HR 84 RR 16 SpO2 97% on room air, GCS 13, NIHSS 14. Temp 98.4 F. Cabin temp 70 F. Glucose 132 rechecked 128 at 0750. Pain 0/10 at initial assessment and 0/10 at handoff. 0743 BP 172/94 HR 82 SpO2 97%; labetalol 10 mg IV at 0744 for BP above stroke target; reassessed 0754 BP 156/86, neuro status maintained, hemodynamics stabilizing with treatment. 0754 GCS 13 NIHSS 14 repeat exam without extension.

Max altitude 1200 ft. Radio report given to Baptist at 0750; stroke alert activated and neurointervention team mobilized by receiving facility. Patient remains at high risk of deterioration without continuous critical care monitoring; care transferred to stroke team on arrival.
